

Affald & genbrug i Våren

Affald

Våren sætter en stor ære i at bidrage til affaldssorteringen. Affald fra ejendommen skal kildesorteres efter kategori og anbringes i de små affaldsstationers (nr. 1-6) containere sådan:

- Dagrenovation (køkkenaffald minus bioaffald) skal anbringes i de 2-3 større containere (grønt låg).

Derudover er der i hver af affaldsstationerne en speciel container til:

- Aviser og andet papir (blåt låg)
- Pap og karton (lysebrunt låg) – æsker og mindre kasser må meget gerne hives fra hinanden eller gøres flade, så der er plads til så meget pap som muligt. Større kasser fra f.eks. møbler, hvidevarer mm skal i stedet afleveres i papcontainerne i storskraldsgården bag Sorrentovej
- Hårdt plast (lysegråt låg) – pres meget gerne flasker mm sammen så de fylder så lidt som muligt. Større plastiskting skal i stedet afleveres i plastcontaineren i storskraldsgården.
- Metal (mørkegråt låg) – til mindre metalting fra husholdningen, større metaldele og -ting skal i stedet afleveres i metal containeren i storskraldsgården.
- Småelektronik (orange låg) – mindre køkkenmaskiner, computertilbehør, mobiltlf'er mm. Større ting så som printere, hvidevarer, fjernsyn, støvsugere mm skal i stedet afleveres i buret til elektronik i storskraldsrummet.
- Biobeholder (mørkebrunt låg) – kommunen uddeler beholder, og grønne nedbrydelige plastposer bestilles gratis via kommunens hjemmeside - <https://www.kk.dk/bioposer>

Glas og flasker anbringes i glascontainerne, som er placeret ved affaldsgården ved Sorrentovej 15 og for enden af Florensvej ved Backersvej.

Fjern venligst metallåg fra glas og blykraver fra vinflasker.

Storskrald

(Affaldsgården på Sorrentovej ved siden af garagerne)

Storskrald skal fra 2015 også sorteres. Læs mere på Nem Affaldsservice

<http://www.kk.dk/da/borger/bolig/affald/affaldsservice> og tilmeld dig evt. gratis sms-service, som sender sms, lidt før de forskellige typer af affald afhentes, så du kan nå at komme af med det. Find din ejendom og indtast din adresse, så kommer du til tilmeldingssiden.

- **Giftigt affald** (maling, opløsningsmidler, mv.) skal sættes ved siden af specielt aflåst skab (vores vicevært låser det herefter inde løbende).

NB! Bygningsaffald, murbrokker, mørtel og cement SKAL afleveres på kommunens genbrugsplads i Vermlandsgade.

- **Professionelt affald** – er det en professionel der f.eks. har nedtaget dit køkken må affaldet IKKE henstilles i storskraldsgården.
- **Elektronisk skrot** – større ting såsom køleskab, fryser, opvaskemaskine mv. skal afleveres i affaldsgården i båsen mærket ELEKTRONIKSKROT.
- **Haveaffald** (herunder også juletræet) placeres i båsen i affaldsgården mærket HAVEAFFALD.
- **Batterier** – Batterier har specielle beholdere, der er opstillet i affaldsstationerne

Refuse, Waste and Recycling in Våren

Refuse & Garbage

Våren prides itself on taking part in the city-wide waste and recycling program, which Copenhagen council has set up. This means that any waste, garbage, or items for recycling need to be sorted accordingly, within the various bins in the 6 green garbage sorting stations along Florensvej and Sorrentovej (numbered 1 through 6).

The sorting stations are for household waste and small articles of recycling only; any larger boxes, metal things, pieces of furniture, wooden scraps, building materials, large electronic goods or hazardous waste should instead be disposed of in the recycling and waste disposal area behind Sorrentovej no. 11-19.

General waste – “Dagrenovation” - (household waste, minus organic matter) should be thrown out in one of the 2-3 large green garbage bins located inside each sorting station.

In addition, you will find appropriate bins for each of the following types of waste or recycling:

- **Bio/Organic** kitchen waste – marked “Bio” (dark brown lid)
Please remember to use biodegradable bags for your organic kitchen waste – new bags, for your little green kitchen caddy, can be ordered through <https://www.kk.dk/bioposer>
- **Paper & newspaper** etc. – marked “Papir” (blue lid)
- **Cardboard and cardboard boxes** – marked “Pap” (yellow lid)
Please pull boxes apart, or flatten them, before throwing them in the cardboard bin. Large boxes like moving boxes or boxes from furniture or electrical goods should be disposed of in the recycling and waste disposal area behind Sorrentovej no. 11-19.
- **Plastics** – marked “Hård Plast” (light grey lid)
Larger plastic items should be disposed of in the recycling and waste disposal area on Sorrentovej
- **Metals** – marked “Metal” (dark grey lid)
Larger metal items should be disposed of in the recycling and waste disposal area on Sorrentovej instead
- **Small household electrical items** – marked “Elektronik” (orange lid)
Larger electrical items should be disposed of in the recycling and waste disposal area on Sorrentovej instead

Lastly, **empty glass bottles and glass jars** should be thrown away in one of the two glass bottle banks located by the recycling & waste disposal area behind Sorrentovej no. 11-19 or at the end of Florensvej right by Backersvej and Café Vaaren.

Recycling & Waste Disposal Area (next to the garages on Sorrentovej)

Since 2015 there has been a system in place, to make sure everyone recycles and sorts their recyclables, bulky waste and refuse accordingly. See <https://www.kk.dk/indhold/jeg-bor-i-lejlighed-0> for more information (an English version should be available at the top of the web page.)

Våren's recycling & waste disposal area is located behind Sorrentovej no. 11-19, to the left of the garages and car ports. It is here you get rid of hazardous waste, larger recyclable items, bulky waste, old building materials, as well as old white goods and furniture.

- **Hazardous waste and dangerous empty containers**

(Solvents, acids, empty spray cans, cleaning products, old nail varnish bottles, buckets of paint, low energy lightbulbs, fluorescent light bulbs etc.)

Any dangerous waste is placed by the big metal cabinet found in the waste disposal area. The things will be locked away in the cabinet by the superintendent, until they are collected.

- **Old building materials**

Old building materials and building waste, such as old bricks, cement, mortar and plaster board need to be got rid of at the local recycling centre by the resident him- or herself. The address is Herjedalsgade 2-4, 2300 CPH S.

If you have had a professional kitchen fitter or a builder to do work in your apartment, it is up to the professional to get rid of the waste correctly, outside of Våren's area.

- **Electronic waste**

In the recycling & waste disposal area you will find an area marked "Elektronikskrot". This is where you leave your white goods, large household and kitchen appliances, old computers and TVs etc.

- **Garden waste**

Plants, potted plants, branches, twigs, dead leaves and old Christmas trees are all placed in the area marked "Haveaffald".

- **Batteries**

Batteries have their own small collection points, located in each of the six sorting stations around Florensvej and Sorrentovej.
